

WEBTimeEntry

Enter labor, expenses, and travel from anywhere

It's time to recycle your paper time sheets and time-consuming processes that go along with them.

With WebTimeEntry, labor, travel and expenses are easily inputted against service calls and jobs using devices your workers are familiar with such as smart phones, tablets, or desktops. Entries flow into Key2Act saving payroll professionals hours every week. Sold as a product not by user count.

The screenshot shows a web browser window with the URL `http://localhost/WebTimeEntry/Views/Tim` and the title 'Time Card Entry'. The user is identified as 'Alan Flint'. The interface includes a 'Select Week' section with radio buttons for 'Current Week' (selected) and 'Prior Week'. Below this is a table with columns: 'New', 'TRX Type', 'Job Number', 'Day of Week', 'Pay Code', 'Hours/Units', 'Cost Code', and 'Cost Type'. A 'Card' tab is active, showing a form with the following fields: 'TRX Type' (SERVICE), 'Weekday' (MONDAY), 'Job/Call' (140905-0007 (EQUIP. AT)), 'Cost Type' (Labor), 'Cost Code' (Labor Category1), 'Pay Code' (Hourly Pay Code), and 'Description' (Consulting). The 'Hours/Units' field contains '5.00'. There are 'Update' and 'Cancel' links at the bottom right of the form, and a 'Submit Time' button at the bottom left. A 'View History' link is located at the bottom left of the browser window.
