

# SelectJobTransfer

**SelectJob**Transfer

**Posting costs to the wrong job  
is an easy mistake to make.  
Not so easy?... Fixing It.**

Overcome posting mistakes by transferring transactions  
from one job to another job.

**Choose costs to transfer to another job, and to what  
cost element type and cost code**

**Eliminates re-keying the adjusting/reversing  
transactions**

**Select posted costs you want to transfer (current  
and historical)**
